

Energy Policy

It is the policy of Pasquill to produce engineered timber products in the most energy efficient manner possible. To achieve this we will:

- Demonstrate Commitment to 'continually improve energy performance'
- Continuously monitor our energy usage, covering electricity, heating oil and gas and fuel for use on and off site.
- Set, pursue and monitor objectives to improve the energy efficiency of our processes
- Comply with all legislation and other requirements applicable to our energy use, energy consumption and energy efficiency
- Provide data on energy use where appropriate
- Consider energy efficiency within all levels of decision making, such as planning or investment in building or equipment.

A handwritten signature in dark ink that reads "Ross Baxter". The signature is fluid and cursive.
